**Subject: TMap® / TPI® newsletter - November 2006**

Dear TPI and TMap colleague,

Through this email we provide the latest news on TPI and TMap. The newsletter is sent between 2 and 4 times a year. This time a very short one!

**Contents:**

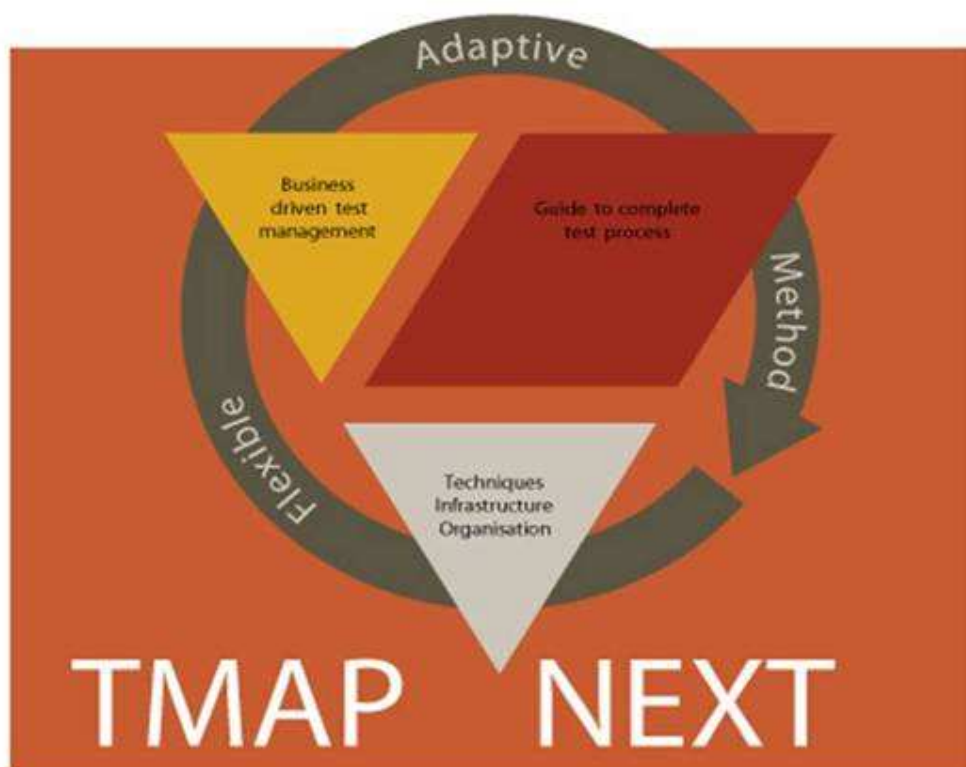

1. New TMap book: TMap Next launch at Eurostar
2. TPI checkpoints in Spanish
3. Sogeti Denmark

For Dutch readers only:

4. Nieuwe TMap boek: Nederlandse uitrol op 20 december

**1) New TMap book: TMap Next launch at Eurostar**

## Discover the ultimate business driven test solution

EuroSTAR ([www.qualtechconferences.com](http://www.qualtechconferences.com)) is always an exciting event. But this time in Manchester, it has something special: the new book "TMap Next" will be launched, introducing a completely revised and updated TMap.

Wednesday December 6 at 18:30 you can experience the highlights of TMap Next during a brief presentation, raise a glass with the authors and receive a big discount for the book.

To raise your expectations a bit, this is what people have said about the book:

*"TMap is one of the most important instruments to control the quality of our IT products."*  
Nico Jongerius, director ITF, member of general management REAAL Insurances, The Netherlands

*"Pick a random spot in this book and you'll find something interesting."*  
Rex Black, test author and President of the International Software Testing Qualifications Board (ISTQB), USA

*"This book will enable a test professional to better balance the test cost with the benefits provided by testing, thus making it easier to get management buy in for the test project."*  
Ruku Tekchandani, SW Validation Program Manager, Intel Corporation, USA

*"TMap is for testing what ITIL is for operational processes."*  
Wim Waterinckx, Process manager Testing, KBC Group, Belgium

TMap Next can be summarised by four essential points:

- The client manages the test process on rational and economic grounds: Business Driven Test Management (BDTM).
- The comprehensive test process, from test execution through test management, includes ample tips and examples.
- Contains a complete 'tool set', i.e. technique descriptions and organisational and infrastructure support.
- Adaptive, meaning that it is suitable for test situations in most environments (such as new development, maintenance, waterfall / iterative / agile development, customised or package software, outsourcing).

TMap Next offers the tester and the test manager guidelines to deliver results for the client. Through the years, TMap evolved into a de facto standard for testing information systems.

It is currently implemented in hundreds of companies and institutions all over the world. The power of TMap can be largely ascribed to the many experiences from actual practice that it incorporates. This makes the book and method a valuable tool for current and future challenges in the field of testing.

## 2) TPI checkpoints in Spanish

The Software Quality and Correctness (SQuaC) group from ITI, Valencia, Spain, has made a translation of the TPI®-material in Spanish. You can find the download at [www.sogeti.nl/tpi](http://www.sogeti.nl/tpi), "Other languages".

## 3) Sogeti Denmark

Sogeti Denmark was established in August 2006. In February 2007 the company will move to new premises in the greater Copenhagen area as well as opening a branch office in Odense. The company in Denmark already has several clients and expects revenues to grow significantly through 2007.

Sogeti Denmark will focus on one major business area where Sogeti has already proved its expertise: Quality & Assurance and Testing (leader in Europe, TPI® and TMap® copyright, 1300 professional testers).

If you have any questions or requests for assistance, please contact the Sales Director for Denmark, Claes Reinholdt Kongsdam at [claes.kongsdam@sogeti.dk](mailto:claes.kongsdam@sogeti.dk)
